Nursery Certificate No. 192 (Resident)

THIS IS TO CERTIFY THAT THE NURSERY PREMISES

of Andorra Nurseries, Inc., Wm. H. Harper, Pres., Chestnut Hill, Pa. Pa.,
including 800 acres of stock have been officially inspected and passed in accordance with the provisions of an Act of Legislature
approved June 29, 1917, amended April 26, 1921, and approved June 7, 1923.

Permission is hereby granted this nursery to sell and ship nursery stock which
has been officially inspected for the year ending September 30th, 1926, provided that
a tag on which a copy of this certificate is printed must be attached to each package
bundle, bale, box or carload lot so shipped.

This Certificate is void after October 1, 1926 but may be revoked for cause.

Issued at the State Capitol, Harrisburg, Pa., Sept. 22, 1925.

Directions for Ordering

**This Price List Conforms with the
1923 Edition Standardized Plant Names**

Give explicit directions as to address and mode of shipment. Shipments will be forwarded exactly as directed, but when without instructions, we will use our judgment in forwarding.

ALL ORDERS ARE ACCEPTED SUBJECT TO previous sale and conditions of stock, under the following terms and conditions:

PRICES in this catalog cancel all previous lists and quotations and are subject to change without notice. **Prices include packing, except on special bulky pieces**, for which cost of packing will be extra, and are **f. o. b. our shipping station**, or for local delivery **f. o. b. customer's place** if within 20 miles of our Nurseries.

STOCK SPECIALLY SELECTED by customers at the Nurseries will be charged according to the value of the trees chosen, irrespective of catalog list price.

RATES.—Lots of 5 and 50 of a variety will be furnished at the 10 and 100 rates respectively. Where no price per single plant is quoted lots of less than five plants of any one sort are sold at the 10 rate, plus 50%.

TERMS, CASH WITH ORDER, except to persons who satisfy us as to their responsibility, when for your convenience accounts will be opened due in 30 days from date of invoice.

OVERDUE ACCOUNTS subject to interest at 6 per cent.

Forwarding and Shipping

SHIPPING SEASON opens about March 1st in the Spring and August 15th in the Fall.

WE WARRANT all goods to be true to name, full count, up to grade, and in good condition when shipped.

GUARANTEE.—We give no guarantee on the life of stock, as we have no control after it leaves our hands, and we will not replace stock without charge.

CLAIMS must be made within **five days** after receipt of goods. Stock delivered as per order and in good condition is not returnable.

GOODS IN TRANSIT.—All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

CLAIM FOR DAMAGE WHILE IN TRANSIT MUST BE MADE AGAINST THE DELIVERY COMPANY. Have delivery agent note the damaged condition on the freight bill, and present your claim promptly to the transportation company.

ANDORRA NURSERIES, Inc.

CHESTNUT HILL, PHILADELPHIA, PA.

The Real Value of Planting

There is no doubt that the pleasure we derive from the contemplation or possession of living plants is increased a hundred-fold by skill in their arrangement in the places where they are finally to grow.

The greatest value that a plant can have is certainly not that of a museum specimen, but lies rather in its power to add comfort and attractiveness to the places where we live, work and play.

To all who have planting to do, from the simplest bit to the development of a large place, Andorra Nurseries strongly recommends the advice of a trained Landscape Architect.

From his experience in the use of plant material he can suggest those combinations and arrangements which will be fitting and wise to prevent costly and discouraging mistakes. Planning ahead is a guarantee of success.

An Invitation to Andorra

Those interested in trees and plants out-of-doors are always cordially welcome at Andorra. Excellent highways through this beautiful rolling section of Pennsylvania, with its charm of Colonial manor house and country-place, offer inviting roads from every direction to visitors in motor cars.

BY MOTOR from Philadelphia, go out the Parkway; along the East River Drive, continuing up the Wissahickon and Lincoln Drives to McCallum Street, turn left and follow through to dead end, turning right on Mermaid Lane and follow good road, turning left on St. Martins Lane, follow through turning right over bridge at Highland Station, continuing three blocks to Germantown Avenue. Turn left to City Line and then left one square to the Nursery.

TRAIN CONNECTIONS over the Chestnut Hill branches of both the Pennsylvania and Reading Railroads make Andorra a two-hour run out of New York and a half hour from the heart of Philadelphia to Chestnut Hill Stations; from Chestnut Hill a ten-minute ride on the City Line car brings one to the Nurseries.

EVERGREEN TREES

This List Conforms with 1923 Edition Standardized Plant Names

All Evergreens are lifted with soil and burlapped

All Prices are for Stock of Our Selection. Customer's Selection
Will be Charged at Value of Stock Selected

ABIES concolor.

WHITE FIR. Tall, rapid growing; hardy rich silvery needles. For specimen or groups.

3 to 3½ ft.Each \$8 50

3½ to 4 ft. 10 00

5 to 6 ft. 15 00

6 to 7 ft. 20 00

Specimens. Large and handsome—

8 to 12 ft.\$40.00 to 75 00

A. nordmanniana.

NORDMAN FIR. Tall; dark, glossy green foliage. Good specimen.

5½ to 6 ft.Each \$20 00

6 to 7 ft. 25 00

Specimens. Broad, spreading trees,
from 8 to 18 ft. in height...\$40.00 to 150 00

A. veitchi.

VEITCH FIR.

7 to 8 ft.Each \$25 00

8 to 9 ft. 35 00

9 to 12 ft.\$60.00 to 100 00

BIOTA (See THUJA).

CEDRUS atlantica glauca.

BLUE MOUNT ATLAS CEDAR. Airy pyramidal tree with silvery-green needles. Use as specimen.

5 to 6 ft.Each \$15 00

6 to 7 ft. 20 00

8 to 10 ft. 35 00

12 to 13 ft. 50 00

Specimens. 14 to 18 ft.....\$75.00 to 150 00

C. libani.

CEDAR OF LEBANON. Its horizontal branches make it a picturesque specimen.

4 to 5 ft.Each \$10 00

5 to 6 ft. 15 00

Specimens. 12 to 16 ft.Each \$50.00 to 125 00

CRYPTOMERIA japonica, Drachioides.

JAPANESE TEMPLE CEDAR. Oriental in effect. As specimen or in groups.

10 to 12 ft.Each \$50 00

14 to 18 ft.Each \$75.00 to 100 00

C. japonica, Lobbi.

LOBB CRYPTOMERIA. Tall and slender. Splendid for Winter effect of dark bronzed-tinged foliage. The beauty-loving Japanese use this stately evergreen especially for setting off their temples.

Specimens. 10 to 12 ft.Each \$50 00

Specimens. 12 to 14 ft. 60 00

Specimens. 16 to 18 ft. 85 00

Specimens. 18 to 20 ft. ...\$100.00 to \$125 00

ILEX. (See also pages 31 and 69.)

I. aquifolium.

ENGLISH HOLLY. Bright and cheery in Winter landscapes in protected corners.

2 to 2½ ft.	Each \$3 50
2½ to 3 ft.	4 50
3½ to 4 ft.	6 00

I. opaca.

AMERICAN HOLLY. Well known and hardier than the English Holly. Effective in border groups or as specimens. Red Berries.

	Each	Per 10
1½ to 2 ft.	\$2 75	\$22 50
2 to 2½ ft.	4 00	32 50
2½ to 3 ft.	4 50	36 00
3½ to 4 ft.	7 50	60 00
4½ to 5 ft.	10 00	80 00
5 to 6 ft.	15 00	
6 to 7 ft.	20 00	
7 to 8 ft.	25 00	

JUNIPERUS chinensis.

CHINESE JUNIPER. Precise columnar form; grayish-green foliage. For formal effects or mixed evergreen planting.

Specimens. 9 to 10 ft.	Each \$35 00
Specimens. 10 to 12 ft.	50 00

J. chinensis, albo-variegata.

WHITELEAF CHINESE JUNIPER. Tall pointed pyramid with attractive colored needles. For formal use.

1½ to 2 ft.	Each \$3 50	32 50
5 to 6 ft.	15 00	
6½ to 7 ft.	20 00	
7 to 8 ft.	25 00	
8 to 9 ft.	35 00	
Specimens. 10 to 12 ft.	\$40.00 to 60 00	

J. chinensis, femina reevesi.

REEVES JUNIPER. Of free-growing form; more valued in mixed planting than formal use. Spreading upright branches.

6 to 7 ft.	Each \$25 00
7 to 8 ft.	35 00

JUNIPERUS chinensis pfitzeriana.

PFITZER JUNIPER. Its sweeping gray-green branchlets give this broad, bushy type value for mixed planting.

1½ to 2 ft. spread	Each \$4 00
2 to 2½ ft. spread	6 00
2½ to 3 ft. spread	10 00
A few large specimens. Prices on application.	

J. chinensis, virginalis.

GLOBE CHINESE JUNIPER. Very low-growing; use in masses in low border planting.

12 to 15 in. spread	Each \$7 50
2½ to 3 ft. spread	15 00

J. communis.

COMMON JUNIPER. Dense fastigate form; grayish-green foliage. Valuable for formal effects.

4 to 5 ft.	Each \$5 00
5 to 6 ft.	6 00
6 to 7 ft.	7 50

J. communis, depressa plumosa.

ANDORRAS PURPLE SPREADING JUNIPER. New introduction. Invaluable in Fall and Winter when foliage is tinged with rich purple.

		Per 10
12 to 15 in. spread	Each \$2 50	\$20 00
15 to 18 in. spread	3 00	24 00
18 to 20 in. spread	4 00	32 50
20 to 24 in. spread	5 00	40 00
24 to 30 in. spread	6 00	50 00
30 to 36 in. spread	10 00	

J. communis, horizontalis douglasi.

WAUKEGAN JUNIPER. Dark green foliage. Low growing, spreading; of exceptional merit.

12 to 15 in. spread	Each \$3 50	28 00
18 to 24 in. spread	5 00	40 00

J. communis, suecica.

SWEDISH JUNIPER. For formal use. Slow-growing; gray-green needles. Tall columnar.

4 to 4½ ft.	Each \$6 00
5 to 6 ft.	7 50

J. excelsa, stricta.

SPINEY GREEK JUNIPER. Close-growing, pyramidal form with gray-green foliage. Excellent in the formal garden.

18 to 24 in.	Each \$4 50	40 00
2 to 2½ ft.	6 00	50 00
4 to 4½ ft.	20 00	
4½ to 5 ft.	25 00	
Specimens. 7 to 8 ft.	35 00	

JUNIPERUS japonica.

JAPANESE JUNIPER. Low-growing with rich green foliage. For the border or rockery.

Specimens.	6 to 7 ft.	Each	\$20 00
Specimens.	7 to 8 ft.		25 00
Specimens.	8 to 9 ft.		\$35.00 to 50 00

J. japonica, aurea.

GOLDEN JAPANESE JUNIPER. Low-growing; needles golden green in Spring.

			Per 10
2½ to 3	ft.	Each	\$5 00
3	to 3½ ft.		6 00
3½ to 4	ft.		7 50
4	to 4½ ft.		8 50
4½ to 5	ft.		10 00
			40 00
			48 00
			60 00
			68 00

J. sabina.

SAVIN JUNIPER. Dark green foliage. Suitable for rockery work.

15 to 18 in.	Each	\$3 50
-------------------	------	--------

J. sabina, tamariscifolia.

TAMARIX SAVIN. Grayish-green foliage, suited for rockery work. Low, spreading.

8 to 10 in. spread	Each	\$1 75	15 00
10 to 12 in. spread		2 50	20 00

J. squamata.

JAPANESE TRAILING JUNIPER. Low, spreading, with sparkling effect of glaucous green foliage. For rock garden or border.

10 to 12 in. x 18 to 24 in. spread..	Each	\$4 00	32 00
10 to 12 in. x 24 to 30 in. spread.....		6 00	48 00
10 to 12 in. x 30 to 36 in. spread.....		10 00	

J. virginiana.

REDCEDAR. Tall and slender, resembling the Italian Cypress in form and rich, dark green color. All these Cedars should be used more in deciduous plantings, where they give an enlivening note in color and form. All the tall varieties are excellent for formal work.

4	to 4½ ft.	Each	\$5 00	40 00
4½ to 5	ft.		6 00	47 50
5	to 6 ft.		7 50	60 00
6	to 7 ft.		10 00	
7	to 8 ft.		12 50	
8	to 9 ft.		15 00	

J. virginiana, glauca.

SILVER REDCEDAR. A bluish gray. For garden or border. Tall and slender.

4½ to 5 ft.	Each	\$12 50
5	to 6 ft.	15 00

Specimens.	8 to 9 ft.		30 00
Specimens.	9 to 10 ft.		35 00
Specimens.	10 to 11 ft.		40 00
Specimens.	11 to 12 ft.		50 00
Specimens.	12 to 14 ft.		60 00

J. virginiana, kosteri.

KOSTER REDCEDAR. Dark green needles. Spreading in habit. For rockery or border.

18 to 24 in. x 2 to 2½ ft.	Each	\$7 50
---------------------------------	------	--------

JUNIPERUS virginiana, elegantissima.

GOLDTIP REDCEDAR. Like Redcedar in form, with attractive golden tipped growth. Habit compact and columnar. An unusual and beautiful tree.

4 to 4½ ft.	Each \$10 00
5 to 6 ft.	12 50
6 to 7 ft.	15 00
7 to 8 ft.	20 00
Specimens. 9 to 10 ft.	25 00
Specimens. 10 to 11 ft.	30 00
Specimens. 11 to 12 ft.	35 00

J. virginiana, pendula.

WEeping REDCEDAR. Slender pendulous branches. Attractive in evergreen or mixed borders.

6 to 7 ft.	Each \$15 00
7 to 8 ft.	17 50
8 to 9 ft.	20 00

J. virginiana, schottii.

SCHOTT REDCEDAR. Very like the Redcedar in form and color. Interesting texture.

5 to 6 ft.	Each \$15 00
6 to 7 ft.	17 50
Specimens. 7 to 8 ft.	20 00
Specimens. 9 to 10 ft.	35 00
Specimens. 10 to 11 ft.	40 00
Specimens. 11 to 12 ft.	50 00

J. virginiana tripartita.

FRONDED JUNIPER. Upright branching habit; foliage similar to Juniperus Pfitzeri.

18 to 24 in.	Each \$5 00
5 to 6 ft.	25 00

PICEA canadensis.

WHITE SPRUCE. Tall, pyramidal, very shapely; foliage silvery-blue. Excellent for grouping.

5 to 6 ft. Each \$7 50

9 to 10 ft. \$15 00 to 20 00

Specimens. Price on application.

P. engelmani.

ENGELMANN SPRUCE. Broad pyramidal form with soft gray-green foliage. Splendid as a specimen.

3 to 3½ ft. Each \$12 50

3½ to 4 ft. 15 00

4½ to 5 ft. 17 50

5½ to 6 ft. 25 00

P. excelsa.

NORWAY SPRUCE. Best Spruce for screens and hedges. Dark green; rapid growth.

Specimens. 12 to 14 ft. Each \$35 00

Specimens. 14 to 16 ft. 50 00

P. excelsa, pyramidalis.

PYRAMIDAL NORWAY SPRUCE. A compact dark green spire shape for formal use.

Specimens. 10 to 12 ft. Each \$25 00

Specimens. 12 to 14 ft. 35 00

P. orientalis.

ORIENTAL SPRUCE. Pyramidal; dark green; valuable for grouping or specimens.

3 to 3½ ft. Each \$10 00

4½ to 5 ft. 15 00

Specimens. 8 to 9 ft. 50 00

Specimens. 10 to 16 ft. \$75.00 to 150 00

P. polita.

TIGERTAIL SPRUCE. Warm, green, spiky foliage. Use as specimen or in groups.

3 to 3½ ft. Each \$10 00

4½ to 5 ft. 15 00

8 to 9 ft. 30 00

10 to 12 ft. \$50.00 to 75 00

P. pungens.

COLORADO SPRUCE. Symmetrical; very hardy; foliage light green. For specimen or windbreak.

5 to 6 ft. Each \$15 00

6 to 7 ft. 20 00

7 to 8 ft. 25 00

Specimens. 10 to 18 ft. \$65.00 to 150 00

P. pungens, glauca.

BLUE COLORADO SPRUCE. Familiar silvery-blue tree; provides distinct color note. Use as specimen.

5 to 6 ft. Each \$20 00

6 to 7 ft. 25 00

Specimens. 8 to 9 ft. \$35.00 to 50 00

Specimens. 10 to 16 ft. \$75.00 to 150 00

Specimens. 18 to 25 ft. \$175.00 to 250 00

A SUCCESSFUL PLANTING at the base of the house, on a rather narrow terrace, where ample space must be left for a walk.

The upright Junipers (*J. va. schottii*) carry out the vertical movement of the gables and windows. The Prostrate Junipers, Evergreen Azaleas and Dwarf Rhododendron form a rich and colorful ground cover, interesting and warm throughout the year.

The entrance door is marked by Specimen Box Bush.

PICEA pungens, kosteri.

KOSTER COLORADO SPRUCE. Like variety *glauca*, but more distinct in rich color of silvery-green.

Specimens. 7 to 8 ft.Each \$35 00

Specimens. 10 to 20 ft. ...\$75.00 to \$150 00

PINUS cembra.

SWISS STONE PINE. Very slow-growing conical tree. Attractive silvery-green needles.

5 to 6 ft.Each \$15 00

6 to 7 ft. 20 00

7 to 8 ft. 25 00

8 to 9 ft. 35 00

P. densiflora, globosa.

JAPANESE TABLE PINE. (Tanyosho.) So named because it forms a wide, soft green table-top. Lavender-candled buds in Spring.

Specimens rich in form and color.

8 to 10 ft x 7 to 8 ft.Each \$50 00

8 to 10 ft. x 8 to 10 ft. 75 00

P. excelsa.

HIMALAYAN PINE. Use this gracefully-branched, silvery-gray-green tree in masses. In habit like White Pine.

Specimens. 9 to 10 ft.Each \$35 00

Specimens. 12 to 20 ft.\$50.00 to 150 00

P. montana, mughus.

MUGHO PINE. Dwarf, slow, compact and neat in habit; very hardy. Its dark green foliage and formal shape make it valuable in the same situations where Boxbush is used. Unclipped, it is admirable in low evergreen plantings or rockery.

N. B.—These have been recently transplanted and sheared back. They still show hard cutting.

30 to 36 in. spreadEach \$7 50

Specimens. 36 to 42 in. spread 10 00

Specimens. 42 to 48 in. spread 12 50

Specimens. 48 to 54 in. spread 15 00

Specimens. 54 to 60 in. spread 20 00

P. nigra.

AUSTRIAN PINE. One of the best for border or mass planting, or as shelter or screen. Its glossy, dark green needles and rugged branches will stand the smoke of cities.

2 to 2½ ft.Each \$5 00

2½ to 3 ft. 6 00

3 to 3½ ft. 7 50

4½ to 5 ft. 10 00

5 to 6 ft. 15 00

Specimens repeatedly transplanted and grown apart; ideal individual trees. These lift with a large compact ball which is carefully prepared for transplanting.

Specimens. 10 to 20 ft. ...\$75.00 to \$150 00

PINUS resinosa.

RED PINE. Beautiful dense tree. Bark, reddish brown; foliage, light green.

	Each	\$	Per 10
3 to 3½ ft.	Each	\$7 50	\$60 00
3½ to 4 ft.		8 50	70 00
4½ to 5 ft.		10 00	90 00
5 to 6 ft.		12 50	100 00

P. strobus.

WHITE PINE. Tall and straight with glaucous foliage. Group on lawn or high border with flowering trees. Use for close screen.

9 to 10 ft.	Each	\$25 00
12 to 14 ft.		50 00

Specimens. 16 to 25 ft.\$75.00 to 150 00

P. sylvestris.

SCOTCH PINE. Reddish brown bark, silvery green foliage. A quick growing screen tree.

3 to 3½ ft.	Each	\$6 00
3½ to 4 ft.		7 50

PSEUDOTSUGA douglasi.

DOUGLAS FIR. Beautiful soft, dark green foliage. Can be used for hedges.

6 to 7 ft.	Each	\$9 00
-----------------	------	--------

Specimens. 7 to 8 ft. 12 50

Specimens. 8 to 9 ft. 15 00

Specimens. 9 to 10 ft. 20 00

P. douglasi, glauca elegantissima.

ROYAL BLUE DOUGLAS FIR. Open growing. Foliage of rich color with purplish tones in the Winter.

4 to 5 ft.	Each	\$8 50
5 to 6 ft.		10 00
6 to 7 ft.		15 00

RETINOSPORA filifera. (CHAMAECYPARIS.)

THREAD BRANCHED JAPANESE CYPRESS.

Medium height; foliage deep green. For formal use. This and nearly all the following Japanese Cypresses are equally valuable in formal work, in mixed evergreen plantings, as specimens, screen groupings and hedges.

4½ to 5 ft.	Each	\$12 50
------------------	------	---------

Specimens. 5½ to 6 ft. 15 00

Specimens. 6 to 7 ft. 20 00

Specimens. 8 to 9 ft. 25 00

Specimens. 10 to 14 ft. ..\$50.00 to 100 00

R. obtusa, crispisi.

YELLOW HINOKI CYPRESS. Loose growing. Warm color note in garden or base planting.

2 to 2½ ft.	Each	\$7 50
------------------	------	--------

2½ to 3 ft. 10 00

4½ to 5 ft. 20 00

5 to 6 ft. 25 00

RETINOSPORA obtusa, nana.

DWARF HINOKI CYPRESS. Very slow-growing, dwarf. Rich, dark green color. Useful in pots, in garden or in rich base plantings.

15 to 18 in.	Each	\$5 00
18 to 24 in.		6 00
24 to 27 in.		7 50
27 to 30 in.		10 00
Specimens. 3 to 3½ ft.		17 50
Specimens. 4 to 4½ ft.		20 00
Specimens. 4½ to 5 ft.		25 00
Specimens. 5 to 6 ft.		35 00

R. pisifera.

SAWARA CYPRESS. Tall, pyramidal shape; broad, flat foliage of deep, glossy green. A beautiful formal specimen when clipped.

4 to 4½ ft.	Each	\$10 00
Specimens. 6 to 7 ft.		20 00
Specimens. 7 to 8 ft.		25 00
Specimens. 8 to 9 ft.		35 00
Specimens. Well clipped and compact.		
10 to 16 ft.		\$50.00 to 100 00

R. pisifera, aurea.

GOLDEN SAWARA CYPRESS. Golden yellow foliage. Like *R. pisifera* in form and habit.

Specimens. 5 to 6 ft.	Each	\$15 00
Specimens. 6 to 7 ft.		20 00
Specimens. 7 to 8 ft.		25 00
Specimens. 8 to 9 ft. ...		35 00
Specimens. 10 to 16 ft.		\$50.00 to 100 00

R. plumosa.

PLUME CYPRESS. This, with the golden variety, stands shearing best. Useful for edges and formal work. A tall pyramidal shape.

2½ to 3 ft.	Each	\$5 00
3 to 3½ ft.		6 00
6 to 7 ft.		15 00
Specimens. 7 to 8 ft.		25 00
Specimens. 8 to 9 ft.		35 00
Specimens closely clipped to narrow columnar form, admirably adapted to formal use, 10 to 16 ft.....		
		\$50.00 to 100 00

R. plumosa, aurea.

GOLDENPLUME CYPRESS. One of hardiest. The rich golden growth of Spring holds well through the Summer. One of the best for specimens or hedges.

Specimens. 5 to 6 ft.	Each	\$15 00
Specimens. 6 to 7 ft.		20 00
Specimens. 7 to 8 ft.		25 00
Specimens. Sheared to close columnar form, 8 to 9 ft.		35 00
10 to 18 ft.		\$50.00 to 100 00

RETINOSPORA plumosa, sulphurea.

SULPHURPLUME CYPRESS. Soft yellowish-green color; compact form.

18 to 24 in.	Each \$3.50
4 to 4½ ft. Extra broad	17 50
5 to 6 ft. Extra broad	25 00

Specimens. Broad pyramidal shaped—

6 to 8 ft.	\$30.00 to 50 00
-----------------	------------------

R. squarrosa.

MOSS CYPRESS. Choice as specimen. Its silvery-blue foliage is soft and extremely graceful, and stands clipping when used in hedges or for formal specimens.

		Per 10
5 to 6 ft. Heavy	Each \$15 00	\$135 00
6 to 7 ft. Heavy	17 50	150 00
7 to 8 ft. Heavy	20 00	175 00

Specimens. Rich in color and sheared to narrow columnar form—

10 to 18 ft.	\$50.00 to 150 00
-------------------	-------------------

SCIADOPITYS verticillata.

UMBRELLA PINE. Characteristically Japanese; compact, slow growing and narrowly conical. A beautiful formal specimen.

Specimens. 8 to 9 ft.	Each \$50 00
Specimens. 10 to 12 ft.	75 00
Specimens. 12 to 14 ft.	100 00

TAXUS baccata.

ENGLISH YEW. A dense, close branched evergreen with dark green foliage. Berries bright red, splendid in protected positions.

Specimens. 8 to 9 ft...Each	\$75.00 to 100 00
------------------------------------	-------------------

T. baccata, aurea.

GOLDEN ENGLISH YEW. Like the green form in habit, but with exceptionally rich golden tinged foliage.

Specimens. Wide and bushy, boldly contoured.	
5 to 7 ft.	Each \$50.00 to 75 00

T. baccata, erecta aurea.

GOLDEN BROOM YEW. Similar in habit to preceding. Foliage bright gold.

Specimens. 5 to 6 ft. ..Each	\$35.00 to 50 00
-------------------------------------	------------------

TAXUS baccata gracilis pendula.

RAMS HORN YEW. Growth symmetrical, with horizontal branches drooping at the ends. Most ornamental of the Yews.

Specimens. 7 to 8 ft.Each \$75 00

Specimens. 8 to 10 ft. 100 00

T. baccata, repanda.

SPREADING ENGLISH YEW. The Yews are exceedingly rich in foliage and useful in all Evergreen planting. This dwarf type is of most pleasing character and masses well with other Evergreens. As a low hedge it has no superior. Low and spreading; luxuriant dark green foliage. For fronting the Evergreen border it is just right.

12 to 15 in. SpreadEach \$3 50

15 to 18 in. Spread 4 00

18 to 20 in. Spread 5 00

T. baccata, washingtoni.

WASHINGTON YEW. Strong growing, dense and bushy; foliage tinged with rich bronze tones in winter. One of the richest of the Yews in form and color.

Specimens.

5 to 6 ft.Each \$50.00 to 75 00

T. canadensis.

CANADA YEW. Of low spreading habit; foliage dark green.

15 to 18 in. SpreadEach \$3 00

T. cuspidata.

JAPANESE YEW. Dense growing, spreading, deep green foliage; very hardy. Use in plantations near house and garden for its note of richness.

Specimens are unusually large pieces with spreading branches forming plants of rich character.

2½ to 3 ft.	7 50
3 to 3½ ft.	10 00
3½ to 4 ft.	12 50
4 to 4½ ft.	15 00

T. sieboldi.

SIEBOLD HEMLOCK. Of somewhat stiffer habit than our American Hemlock; deep green glossy foliage; most decorative as a specimen.

4 to 5 ft.	Each \$15 00
5 to 6 ft.	17 50

Trees for Screens and Windbreaks

By properly planting trees of quick-growing varieties in combination with slower growing, more permanent sorts, it is easily possible in a few years' time effectively to blot out objectionable views which mar the outlook from house or lawn, at the same time, by planting flowering trees, evergreens or shrubs on the lawn side, producing an added attractive landscape feature.

8 to 10 in.		10 00

***F**OR strongly framing a fair vista or formally marking an important axis, there are no finer evergreens than the upright Junipers and the Red Cedar and its varieties. These are dense foliated trees with a wide range of color from bluish gray to deep rich green; will stand difficult exposure and lend themselves to shearing. They certainly help to make the picture here.*

COTONEASTER buxifolia.

R. minus (punctatum). Dotted Rhododendron.

18 to 20 in. BushyEach	\$4 25	37 50
--------------------	-----------	--------	-------

YUCCA filimentosa.

ADAM'S NEEDLE. Heavy clumps. Each \$1 50 12 50

THIS axis-vista is similar to that shown on page 29, but the requirements as to detail and general atmosphere are different. A softer, more naturalistic framework was desirable and this was obtained effectively by the use of the Drooping Privet (*Ligustrum Regelianum*) backed by Dogwood (*Cornus Florida*); Flowering Crabs (*Malus* in variety), Flowering Cherry (*Cerasus Avium alba Plena*); Hawthorne (*Crataegus* in variety) tied together with drifts of Golden Bell (*Forsythia*) and the rich fruiting *Viburnums*.

DECIDUOUS TREES

The Sweet Magnolia

A BEAUTIFUL, small, shrubby tree, thriving in any good soil or situation, and useful for positions too damp for many trees. The rich, glossy green foliage is glaucous beneath, giving the whole a silvery sheen. The cream-white, waxlike flowers are highly fragrant, and the seed-pods which follow open to show brilliant coral seeds.

Used in masses with evergreens, in the shrub border, as hedges or for specimens, it gives added pleasure to any planting.

PERSIAN IRON WOOD. Dense growth, round top, spreading branches; brilliant Fall foliage.

4 to 5 ft. Each \$5 00 40 00

PERSICA vulgaris alba plena.

DOUBLE WHITE-FLOWERED PEACH. Pretty in formal garden or with evergreens in border.

4 to 5 ft. Each \$1 50 12 00

P. vulgaris sanguinea plena.

DOUBLE RED-FLOWERING PEACH. Similar to above, with very beautiful large double red flowers.

4 to 5 ft. Each \$1 50 12 00

THE effect of a pool of still water depends largely upon its setting. The charm of this one is two-fold; because of its position as a fore-ground for a view of folding distant hills, and because of its immediate setting of mature, towering specimens of the Oriental Arborvitae, which gives one the impression of having been reflected in the quiet water almost as long as the ancient hills beyond.

PLANERA japonica.**JAPANESE WATER ELM.** A rare tree.

18 to 20 ft.Each \$25 00

PLATANUS orientalis.**EUROPEAN PLANE TREE.** This rapid-growing, symmetrical, wide-spreading tree, is most suitable for city street planting. Attractive trunk and foliage, fine, symmetrical head. Not bothered by insect pests or smoky, dusty locations.

PYRUS. See *Malus*, pages 49 and 50.**PYRUS.** See *Aronia*, page 60.

Plant for Immediate Effect

WE ARE EQUIPPED to supply shade trees thirty to forty feet in height, producing immediate effect on estates which would otherwise be shadeless and uninteresting. Such trees as Maples, Elms, Oaks, Lindens, Planes and Beech give charm and service.

THE OAK

On account of its long life and freedom from injury by storms the Oak is generally looked upon as an extremely slow growing tree. To the contrary some varieties grow quite as fast as our other hardwood trees, notably the Pin and Red Oaks.

QUERCUS alba.

WHITE OAK. Broad, open head; in the Fall purplish-brown leaves, on spreading branches, held through Winter.

8 to 10 ft.	Each \$5 00
10 to 12 ft.	7 50
12 to 14 ft.	10 00

Q. bicolor.

SWAMP WHITE OAK. Vigorous; holds leaves till early Winter. Prefers moisture.

8 to 10 ft.	Each \$5 00
Heavy. 4 to 5 in. caliper.	\$15.00 to 35 00
Specimens. 20 to 25 ft. Prices on application.	

Q. cerris.

TURKEY OAK. Rapid, vigorous, pyramidal. Attractive oblong leaves.

TAXODIUM distichum.

BALD CYPRESS. Tall, thin shape; soft light green foliage against cinnamon bark. Prefers moisture.

8 to 10 ft.	Each \$5 00	
10 to 12 ft.	7 50	
12 to 14 ft.	10 00	

TILIA euchlora.

CRIMEAN LINDEN. Thick, deep green, glossy foliage on bright green young growth. For avenue.

16 to 18 ft.; 4 to 5 in.	Each \$20.00 to \$35 00	
-------------------------------	-------------------------	--

T. tomentosa.

SILVER LINDEN. Leaves green above, silver beneath. Broad, shapely, pyramidal habit. Beautiful lawn specimen.

16 to 18 ft.; 4 in.	Each \$20 00	
--------------------------	--------------	--

Specimens. 18 to 22 ft. Prices on application.

T. vulgaris.

COMMON EUROPEAN LINDEN. Vigorous, handsome, symmetrical; rapid growing. Excellent for avenues.

10 to 12 ft.; 2 to 2½ in.	Each \$7 50	
12 to 14 ft.; 2½ to 3 in.	10 00	
16 to 18 ft.; 4 to 5 in.	\$20.00 to 35 00	

Specimens. 18 to 25 ft. Prices on application.

THE ELM

Holding a distinctive place as a street tree or stately specimen the American Elm has become more widely known than some of the other varieties; these should share with the American species its popularity as they are adapted to a wide range of soils and possess the merit of being fairly rapid growers.

ULMUS americana.

AMERICAN ELM. Vase-shaped head. Particularly appropriate for street or lawn planting, giving vaulted cathedral effect.

	Each	Per 10
10 to 12 ft.; 1½ to 1¾ in.	\$3 50	\$31 50

U. glabra.

SCOTCH ELM. Broad, round-topped head with spreading branches.

14 to 16 ft.; 4 to 4½ in. Each \$17 50

Specimens. 18 to 20 ft.; 6 to 8 in.

Each \$75.00 to \$100 00

***T**HE CHARM of informal small shrub planting is shown here. The pendulous form, softness of outline and richness of color of *Abelia*, *Azalea* and *Barberry* massed under an occasional *Pine* and flowering tree, make this walk delightful and full of surprises at all seasons of the year. An unimportant and unattractive side of the house may thus be turned into a spot of beauty.*

ILEX. (See also pages 10, 31 and 69.)**ITEA virginica.**

SWEETSPIRE. Low shrub; white fragrant flowers in Summer and bright crimson foliage in Fall.

1½ to 2 ft.	Each \$1 50	10 00	
------------------	-------------	-------	--

Japanese Winterberry

ILEX SERRATA (SIEBOLDII)

OF THE many interesting introductions from Japan, this beautiful shrub stands out as preëminent for its wonderful display of bright red, holly-like berries, which quickly crowd every twig. It is of slow growth and capitally suited for planting in evergreen beds or borders, where its beauty is doubly enhanced. The berries remain until late in the winter.

	Each	Per 10
2 to 3-foot plants	\$2 00	\$18 00
3 to 4 foot plants	3 00	27 00
4 to 5 foot plants	4 00	36 00

6 to 7 ft. Heavy	7 50	60 00

Symphoricarpos

TWO attractive native plants seldom seen in masses where they can be used to best advantage. Planted as an undergrowth for evergreens or taller shrubs, the slender branches are weighed down by clusters of the white waxy berries of the Snowberry and the bright maroon berries of the Coral Berry, like strings of coral. The Snowberry is particularly adapted to garden cultivation, while the Coral Berry is at its best under wilder conditions. Cut for house decoration, they last splendidly.

Symphoricarpos racemosus

SNOWBERRY

Low, shade-loving plant; large white berries in fall and carried through the winter.

	Each	Per 10	Per 100
2 to 3 ft.	\$0 50	\$4 00	\$35 00

HARDY HERBACEOUS PERENNIALS

This List Conforms with 1923 Edition Standardized Plant Names

N. B. Quantities of 5 and 50 OF A VARIETY will be furnished at the 10 and 100 rates, respectively.

Less than five plants of one sort are sold at the ten-rate, plus 50%.

THERE is a strong appeal in the gardens of old farmhouse and cottage, with the glowing yellow and orange Day-lilies, bright flowered Phlox and Peonies, and their show of hardy Chrysanthemums; a demonstration of the ease with which these plants are grown and the little care they require when one thinks how little time the busy country housewife can spend in gardening. The old-fashioned perennials have been enriched with many improved varieties and species, and every corner of the grounds can be kept bright throughout the whole growing season; the tall growing varieties can be effectively planted in the shrubberies, their flowers showing

against the background of evergreen or shrub, and the lower sorts blending the edge of shrubbery and lawn in naturalesque borders, or the wood edge made gay with some of the Asters, Foxgloves, Ferns and many others.

Of flowering plants, two things are demanded—Varieties which will brighten our lawns and gardens, and which can be cut for house decoration—these hardy herbaceous plants reward us bounteously in both requirements. The height, color and flowering season of each variety are given in the following list.

ACHILLEA millefolium roseum, var. Cerise Queen.

June to September. Amaranth-red. 1½ ft..	Per 10 \$2 50	Per 100
--	------------------	---------

A. ptarmica (Sneezewort). All Summer. White. 2 ft.	2 50	\$15 00

AQUILEGIA

LONG-SPURRED COLUMBINE

THE wealth of the various colors of this Columbine can only be appreciated by seeing them in bloom, but we have endeavored to give an idea of their loveliness. The Long-spurred Hybrids with their many colors flower in June. They can be used as garden plants, but rich effects can be procured by naturalizing them in masses.

Aquilegia, Mrs. Scott Smith's Long-spurred Hybrids. May to August. In a wide range of mixed colors. \$3.50 for 10, \$20 per 100.

HARDY FERNS

50c each; \$3.50 per 10; \$25.00 per 100

ADIANTUM pedatum (Maidenhair Fern). 1 to 2 ft. Moist, shaded positions.

ASPIDIUM acrostichoides (Christmas Fern). 1 to 2 ft. Evergreen. Dry or moist soils in shady places.

A. Felix-mas (Male Fern). 2 ft. Semi-shaded positions, dry or moist soils.

A. Goldianum. 2 to 4 ft. Semi-shaded positions, dry or moist soils.

A. marginale. Evergreen. 1 to 2 ft. Shaded positions, dry or moist soils.

ASPLENIUM Filix-fœmina (Lady Fern). 2 to 3 ft. Open or shaded positions, in moist or dry soils.

BOTRYCHIUM virginianum (Moonwort). 6 to 12 in. Shaded positions, moist or dry soils.

DICKSONIA punctilobula (Boulder Fern). 2 to 3 ft. For open positions; forms large plantations.

ONOCLEA sensibilis (Sensitive Fern). 1 to 2 ft. For open planting and wet soils.

O. Struthiopteris (Ostrich Fern). 2 to 4 ft. For open positions, dry or moist soils.

OSMUNDA gracilis (Flowering Fern). 2 to 4 ft. Open or shaded positions, and moist soils.

O. Claytoniana. 2 to 5 ft. For open plantings, dry or moist soils.

O. cinnamomea (Cinnamon Fern). 2 to 5 ft. For open or shaded positions, in wet soils.

O. Regalis (Royal Fern). Wet positions. Sun or shade. 2 to 3 ft.

PHEGOPTERIS hexagonoptera. For shade. 1 ft.

POLYPODIUM vulgare (Polybody). For rock work. 4 to 10 in.

WOODSIA obtusa. 6 to 12 in. Shady places, in moist soil.

WOODWARDIA angustifolia (Chain Fern). 1 ft. Open or shaded positions, in moist soils.

***E**VERGREENS within a garden. They make a delightful background for the rich coloring in the flower borders. The enclosing hedge is of Hemlock; the beds are edged with Box, and Specimen Box Bush mark important corners. The pool is bordered with Prostrate Junipers (*J. sabina tamariscifolia*).*

HARDY CHRYSANTHEMUMS

When frost has browned the other flowers of the garden, these hardy plants burst forth in a profusion of bloom, in colors which seem to catch the most delicate tints and shades of bronzing leaf and gorgeous Autumn sunset, while some foretell the purest white of coming snow, and pink of purpling shadows.

Planted in the hardy garden, border or lawn at edge of shrubbery, they will yield a wealth of bright flowers in late Autumn, and fill the house with cut flowers.

35c each; \$2.50 per 10; \$15.00 per 100

A Very Satisfactory Way to Utilize an Old Pond Bed or Bog

JAPANESE IRIS (*Iris kaempferi*)

50c each; \$4.00 per 10 OF ONE VARIETY

\$35.00 per 100 in not less than 10 of a Variety

Of all the Iris family none equal the Japanese. The large blooms, carried well above the foliage, are gorgeous in their coloring, which ranges from purest white to deep purples, indigo blues and mahogany red, between which there is a wonderful array of tints and mottlings. To see our collection a visit to Andorra in June is worth while; or, better, buy a full set.

Dinah No. 13. Purple flaked with white.

Mahogany No. 26. Deep, velvety, mahogany red.

Neptune No. 30. Rosy-purple suffused with light blue.

Oriole No. 32. Purple amaranth.

Princess Clothilde No. 36. Ash gray blushed with purple.

Pyramid No. 38. Deep violet-purple veined with white.

Quakeress No. 39. Lavender rose.

Robert Craig No. 41. French gray, base of petals tinted with violet.

Shadow No. 42. Deep blue shading to indigo.

Snowbound. White—three petaled.

Templeton No. 45. Violet-purple marbled with white.

Vesta No. 48. Distinctly veined with purple.

Victor No. 49. Porcelain veined with blue.

Zenobia No. 52. Light ground suffused with reddish purple.

Rich in Form and Color, the Peony is a Fine Cut Flower

PAEONIA—PEONIES

Rich in an infinite variety of color, from white through tints of pink and rose to darkest crimson, these hardy plants grace garden, bed or border with gorgeous bloom in May or June, and their fragrant flowers are most decorative when cut for the house or porch. Whether against a background of evergreens or shrub border, or in the garden, they yield a rich return in blossoms. They are best transplanted in August or September, but may be moved in very early Spring, and should be planted about two feet apart in good ordinary garden soil.

We are making some changes in our extensive plantations of peonies, and can offer strong plants from some of the best varieties, in assortment, for Fall planting, at exceptional values.

Mardonius. Bright crimson. Dwarf grower....	75	5 00
Medusa. No. 432. Rosy lilac.....	75	5 00

PHLOX

PHLOX PANICULATA—HYBRID PERENNIAL PHLOX

A succession of flowers of greatest beauty from early July until frost, in softest tones of pink and rose, salmon, mauve and silvery white in great panicked blooms, will brighten the hardy border of mixed varieties of Phlox. Easy of culture, and perfectly hardy, the plants can be used at the edge of shrub border or in the garden, spaced about eighteen inches apart.

Assortment in Mixed Colors of Our Selection

R. P. Struthers. Bright, rosy-carmine, claret-red eye.

Sieboldi. Orange-scarlet.

Sunshine. No. 162. Medium, early. Bright red, crimson eye.

Thor. Deep salmon pink, 35c. each; \$3.00 per ten.

INSECTICIDES

All prices are subject to change without notice.

Sunoco Spray Oil

A heavy oil which readily gives a permanent and uniform emulsion when mixed with water. For all scale insects, mealy bugs, woolly aphids, mix at strength of one part oil to twenty parts of water (1 qt. to 5 gallons). This also kills the eggs and prevents Summer infestations of red spider, aphids and many other insects. January, February and March are favorable months for this treatment, but the late Fall, just after the leaves drop, is just as good. It is also used as a Summer spray and as a spreader for Bordeaux, lead arsenate or nicotine sulphate. Do not use with lime sulphur.

PRICES:	½ gallon cans	@	\$0.85
	1 gallon cans	@	1.50
	5 gallon cans	@	5.75
	15 gallon drums	@	.70 per gallon
	30 gallon drums	@	.60 per gallon
	50 gallon drums	@	.50 per gallon

CALCIUM CASEINATE (Red Diamond). A powder. Not in itself an insecticide. Its peculiar properties cause a better adhesion and a uniform coating of the poison sprays to the foliage, fruit or bark, effecting an economy by giving better coverage and keeping the poison on the parts of the plant when it would otherwise be weathered off. 1½ lbs. are sufficient for 200 gallons (or one tablespoonful to 5 gallons) of spray material such as lead arsenate, lime sulphur, nicotine sulphate, etc. It is a vital ingredient of dry mixed sulphur and lime. Ask for *Red Diamond Brand*.

PRICES:	10 lb. sacks.....	@	\$1.00
	50 lb. sacks.....	@	4.50
	100 lb. sacks.....	@	8.00

LEAD ARSENATE. A powder. An internal poison for destruction of leaf-chewing insects and fruit feeders, such as codling moth, curculio, bag worms, walnut caterpillars, tent caterpillars, tussock moth, potato bugs and many others. Use 2 to 3 lbs. per fifty gallons of water.

PRICES:	4 lb. bags.....	@	\$1.50
	48 lb. cartons.....	@	14.00

BORDEAUX-LEAD ARSENATE combination. A powder. The insecticidal and fungicidal properties of these two materials, as previously described, are brought together in this useful combination. Use 3 to 6 lbs. to 50 gallons of water.

PRICE:	5 lbs.	@	\$2.25
---------------	-------------	---	---------------

PARADICHLOROBENZENE (P. T. B.). Small crystals. Apply these about base of trees for control of borers in peach and cherry (not apple). Use from $\frac{1}{2}$ to 1 ounce per tree. It may be used with perfect safety on very young (2-year-old trees) if raked from about trunk at end of three weeks. Directions on cans.

PRICES:	5 lbs.	@	\$1.75
	10 lbs.	@	3.50
	25 lbs.	@	7.50
	50 lbs.	@	14.50
	100 lbs.	@	28.00

NICOTINE SULPHATE (40%). A liquid. Aphids and all kinds of soft-bodied insects and some midges and some larvæ which do not come in this category are most effectively destroyed by this contact poison when used one part to 800 of water (1 or 2 teaspoonfuls per gallon). Makes a fine combination with Sunoco Spray Oil for control of box leaf miner and lace bugs. Roses, chrysanthemums, nasturtiums and other flowers should be sprayed with it regularly throughout the Summer. Full directions on can.

PRICES:	$\frac{1}{2}$ lb. can	@	\$1.25
	2 lb. can	@	3.50
	10 lb. can	@	13.50

FERTILIZERS

FINE GROUND RAW BONE. For lawns apply 1000 lbs. per acre.

PRICES:	Bag of 200 lbs.	@	\$6.00
	Per ton (2000 lbs.)	@	50.00

F. & I. TOBACCO. Fine ground, excellent as a grass fertilizer.

PRICES:	Bag of 100 lbs.	@	\$3.50
	Per ton (2000 lbs.)	@	45.00

PEAT (Holland Peat). This is very finely ground. Excellent for potted plants or for Azalias, Rhododendrons and similar plants.

PRICE:	Per bale	@	\$5.00
---------------	----------------	---	---------------

WHITE ROSE PLANT FOOD. A plant food which furnishes in correct proportions and available form, the three necessary elements which sustain the plant in all stages of its growth—potash, phosphorus and nitrogen. For grasses, flowers, vegetables, shrubbery, roses. Fine for lawns and golf greens. One pound treats 50 square feet of lawn. Full directions with each package.

PLANTING INSTRUCTIONS

Introduction : Many of our customers, after the receipt of goods, write or telephone us for some suggestions for the proper planting of the material in hand, and in order that the proper information may be at hand so that the stock can be promptly and properly cared for, we have written the following brief but complete instructions, which if followed will insure satisfactory results.

The Whole Subject of Successful Planting

may be briefly summed up as follows: Use Andorra-grown Trees, Shrubs and Plants; a well-drained hole larger than the spread of the roots; good soil, broken roots carefully trimmed and the top branches shortened in; soil packed so that the tree stands quite firm; a heavy mulching as soon as the planting is completed; careful watering during the first season, and thorough cultivation afterward.

On Arrival of the Shipment the bales or cases should be opened at once (except in freezing weather, when they should be placed in a cellar or other protected place to thaw out before unpacking), and if the stock cannot be planted at once it should be "heeled-in," taking care to protect the roots from the sun and winds. To do this, select for a heeling-in ground a location where there is good drainage; dig a trench from 1½ to 2 feet in depth and of sufficient width to accommodate the roots without bending them. In this trench set the trees close together, covering the roots carefully and thoroughly with soil, taking care that it is well worked in about them so as not to leave vacant spaces; then mound the soil along the line of trench, so that it will turn off the water in case of heavy rains. This is of special importance where the trees are to remain heeled-in any length of time.

Preparing to Plant. The most important point is the preparation of the hole; this should be dug at least a foot or two wider than the spread of roots of the tree to be planted, a very large specimen, when it should be proportionately deeper, and in the bottom of the hole the soil should be well loosened. Where the soil is not good, a much larger excavation should be made, and refilled with first-class soil. Should the planting space be in a clayey soil, the bottom of the hole should be thoroughly loosened, if possible, digging or blasting entirely through the clay; if not, then dig deep enough to fill in with stone or other loose material to provide proper drainage, which is most important.

Kind of Soil. A frequent question is "what kind of soil to use and with what to enrich it." Just here we would emphasize the fact that too much care cannot be taken with the preparations for planting. It is absolutely necessary that the tree be given an abundance of good soil if one would attain satisfactory

results. The best is that stripped from an old meadow, where the sod and topsoil can be taken together. It is always advisable, where much planting is done, to have a compost heap prepared the season previous by putting soil and manure in alternate layers, and turning the pile two or three times in the season to thoroughly mix them and prevent the manure burning out. When either of these kinds of soil is not procurable, old thoroughly rotted manure can be mixed with the soil for planting, but in no case should fresh manure or patent fertilizers be used.

When Setting the Tree

take care that all broken portions of the roots are cut off in a clean, careful manner, cutting from the under side upward and using a pruning knife in preference to shears; then spread the roots in a natural position, taking care that the small fibers are not twisted or crowded. Fill in with good, fine soil, which should be worked carefully under the roots, so that no spaces remain unfilled. Be careful not to plant too deep. The tree will generally show by the soil mark on its bark the depth at which it stood in the nursery, and it should not be set more than two or three inches deeper. As the soil is filled in by layers, it should be carefully and firmly packed until the hole is filled to within an inch or two of the top. If it is dry weather the watering should now be done, and then the last of the soil spread without packing it. This loose top soil will act as a mulch and help to retain moisture.

After Planting.

As soon as the hole is filled and the tree has been properly and firmly set, spread over the surface a layer 3 to 4 inches thick of either old or fresh manure, to extend a foot or two beyond the line of the newly-filled hole. This mulching is important, as it will shade the ground and help to hold the moisture, and moisture is, after careful planting, the most important aid to insure success. It should be borne in mind that when a tree is transplanted, no matter how carefully the work is done, it is impossible to take up the entire root system, and therefore, before it is able to care for itself, new roots must be formed to take hold of the soil. In the meantime the moisture is being continually evaporated from the trunk and branches by the action of the wind and sun, and this must be balanced by an artificial supply. During the dry spells and hot weather of the following season, the soil around the base of the tree, for a space wider than the hole, should be frequently watered, but not sufficient to make the ground soggy, and when possible the foliage should be sprayed.

Proper Pruning.

As it is impossible to transplant a tree without affecting the root system, it is important, in order to balance the supply and to help avoid excessive evaporation, that the top of the tree should be cut back. The amount of cutting depends entirely on the amount of fibrous root carried by the tree, although hard-wooded varieties usually require harder cutting than soft woods. It is a good rule to remove about three-fourths of last year's growth from all the branches; and in doing this use a sharp knife, making a perfectly clean cut, and taking off the branch or part

of branch either at a fork or close to a strong bud. Be very careful not to leave stumps, as they invariably die back and create decay. The best time for pruning is when the trees are set out, and if they are large it will be found advisable to cut them before they are planted; but in every case be careful to preserve the natural form of the tree, and do not cut back into old heavy wood that does not show buds.

Shrubbery will, as a rule, stand considerable pruning when set out. This must be determined by the shape of the plant, the amount of growing roots it carries, and the season at which it is to bloom. If lilacs and forsythias are planted in the Spring or Fall, and pruned severely, the next season's flowers will be lost, as they make their flowering buds on the old wood; and in case of shrubs of similar habit the pruning should be moderate, or if the plants are sufficiently robust the pruning should be left until the flower is past, and then done before the new growth commences, so that they will set their bloom for the following year. On the other hand, shrubs like *Hydrangea paniculata grandiflora*, which make their bloom on the growth of the current year, should be cut back severely in the early Spring, after the danger of hard freezing is past, as severe pruning induces new growth, and hence a greater abundance of bloom. Shrubbery pruning should be done with a knife, not with hedge shears, and, as a rule, just after the plants have flowered; but in some cases this would prevent the showy fruits and seeds in the Autumn. It is almost impossible to give general directions for pruning shrubbery and to those who wish more information we shall be glad to recommend books which treat the subject very fully.

Planting Perennials. The first thing to be considered is the proper preparation of the soil. The beds, enriched with well-rotted manure, should be dug deep, especially if there is a clay bottom, which should be broken through to give the bed proper drainage and permit deep rooting of the plants, so that they will withstand the drought of Summer. If planted in dry weather, they should be well watered, and throughout the Summer the surface of the beds thoroughly cultivated to keep down the weeds and conserve the moisture. All plants having weak stems should be staked to keep them in their natural position, and as soon as the individual flowers are passed they should be cut off to allow the strength of the plant to go toward forming other flowers instead of seed. This will prolong the period of the bloom. In the Fall cut all plants, except those which are evergreen, to within six inches of the ground, and cover the beds with long manure. In the Spring the long, strawy part of the manure should be removed and the short litter that remains be forked into the beds, to enrich them and aid the soil to retain moisture. A garden-fork should be used in working the beds after planting.
